

## Aesthetix for Taj Residency

Taj Residency located in the heart of the capital city of Kerala, property includes a Shanghainese Restaurant, High energy bar, Spa, Gym/Health clubs, Beauty salon, Staff cafeteria, Reception, Lobby lounge, Multi Cuisine Restaurant, Car calling service & Executive Lounge areas. Those areas needed a commercial sound system that enables guest to enjoy sound wherever they are, indoors/outdoors throughout the hotel all from a background sound system that blends into the beauty of the resort. The innovative design of the loudspeaker disperses sound evenly both horizontally and vertically so that listeners can hear quality sound wherever they go.

The property also includes Meeting spaces such as Banquet halls, Ball rooms, Board rooms, Meeting rooms, Training rooms where professional AV systems offers more robust, versatile solutions to meeting planners and guest. Our AV solution encompassed the 4575 sq ft Twin ball room, 2237 square feet Function room, 297 square feet Training room & 224 square feet Meeting room.

The Ball room's spaces are combinable for larger presentations and each ball room has a Zoned audio system that allows the room to operate independently when separated or when combined.

As with the ball rooms, each Meeting room contains touch panels that allow for source selection such as projector for Presentation mode, DVD for Video mode & also volume control for audio system.

The unique design of the board room includes a 100" front projection system with motorized lift for projector. The screen can present an image from any of the following sources: VC, Dedicated Computer, DVD & few laptops. To increase the audio clarity of the attendees for Video Conference and Audio Conference, wireless boundary microphones were provided in the board room. Access to the control system is via a 8.4" wireless colour touch panel. The control system is programmed to control all Audio and Video technology, including Switching of sources. The ceiling also has four invisible ceiling speakers for voice reinforcement.

The Function room is used for PC presentations and Video Presentation. All systems can be controlled via the 8.4" wireless colour touch panel.
